

## >>> HOW TO MAKE <<<

1. Cut out the medals carefully. One of the two copies is for the front side, and the other is for the back side.
  - > It's recommended to glue on a cardboard for better stability.
2. Cut out the part that's written "CUT INSIDE". Then there's the hole to add in a string. You can use the leftover paper after cutting out the medals to make that string or you can use a ribbon, or a sewing rope to make one.

If you plan on using paper string and if it's too short, you can make another string and glue it to your already-existing string to lengthen it.

That's all!
